BANGOK, Lake Chara AROOSTOOK LANDS.

Dr. Holmes, who was appointed by the board d Infeinet liupuavements, to taske an agriculturl explenation and survey of the Aroustic hands, has arrived, with his party, in company with Absaurreyor sent to by out a township for settlers, at the head waters of the Arnostic fiver, from which point, the following letter, daled Jone 34, headlen received from him.

Dear Sir Ikre we are like Mises of old, not exactly on the top of Pisgah, but nevertheles, in right of the "promised land."

It was thought best by our boatmen to come up the East Branch, in as much as there were one or two less spassing places, and the stream is not so rapid as the Sebois. I know not how tion is sometimes performed, may prevent the this may be, but this I new know, it is a gevere journey here by water, and as there is no road, much worse by land.

The business of carrying by, or over the poringes, is exceedingly-laboriums. It is automishing to me that nobody, neither State nor proprietor. nor lumber men, have ever lilted their kands torerda imprating their gortages. In many places, not even the watige of a road, nor the besinning of a path is to be found. In others you will find a rude troit miscalled a road, over tunity should not be deglected. which, the men have to shoulder the barrels of pork like Jacob's son Isanc "bowing between two burdens." Alt being Sanday, I trust that I.

Thave made observations respecting the improvement of the Penalscot, and, though not connected with it, that I presume it may be ri de an item in me report. I skall examine the place with a view of of connecting the Pethe La Pompique and examine that place too.

I send your a package of minerals which I have collected on our way up. I have had no tiu- to examine them particularly or minutely, and perhap have labelled some of them wrong.

I also send you a package of a species of plant which I found yesterday in a derk and dense cedar swamp. They look odd to me, and as it rained a torrent I did not stop to ascertain its the Governor of this State voluntarity offered a-me or species it is bulbous moted, and is probably either an Arethusa or Maleris.

Ifaving nothing further to communicated will Very respectfully yours, E. Hormes...

By another letter of the same date, received from one of the Surveyors, it appears that the party expected to reach the township to be surveyed, No. 10, in two days.

Had it not been for the baneful influence of Loco Focoism in the last Legislature, the Arose. of his prosecutors. took mad would have been completed this year Hie people will recollect to what influence they are to attribute the loss of the bill which passed the House, making an appropriation for that purpose. They will long remember, especially, in the county of Peach cot; the names of HIG. GINS and EMERY, who secrificed the interests of the new settlers upon these fertile lands and that their duty to their constituents, that they migh show their party how closely their lars fitted them.

There are now more than one hundred individuals on their way to the Avoostook country when and for others by a homethey are emsompanies in various parts of the State, and represent, at least, more than five hundred, and probably a thousand persons, desirous of emigrating to this fertile region. Among other places where these companies have been formed are Portland, Hellowell and Augusta, Canaan, Old town and the Piscataouis.

M. P. Norton, Esq formerly Land Agent of "this Blute, is an agent for more than one hundred joung men in Somerret county. He passed through Bangor last week on his way to the Atoostrok to select lots.

The completion of the read (which, in consequence of the party vote in the Senate before numbireed, 's delayed for another year) will be followed by a tide of emigration equalied only by the accent such into the Western States. We understand that our Land Agent has received letters from individuals in other States, expressing a desire to avail themselves of the encouragement offered to settlers byfthe new law. But for ant of a road they will probably turn their attention to some other quarter. They should not be discouraged, however, for it will, without doubt, be one of the first acts of the next Tegislature to make an appropriation for its completion. H is in fact now in progress. Vaccination. The following is an extract trus present letter of Da. Watorken , where upon to subject of As function, as he was the first will introduced it into this country. -diately after the discovery by Jenner of its wonderful efficacy as a preventive of small pox. It is highly hisporiant that wayry individual, buth for his own sake, and as a duty which he owes to the community, should be throughly vaccinated. Many have sacrificed their lives by exposure to that most loathsome dicase, the small city. pox, under the belief that they were protected from danger by vaccination, when in fact, the system had never undergone the vaccine disease. Such was the case with the late Rev. Mr. Knowles, who vaccinated himself in his youth. The bad quality of the matter employ. ed, or the bungling manner in which the operadesired effect. It is also well known that another discuse, even of a trifling nature, such as a cutaneous eruption, will counteract the influence of the vaccine matter. The only uncertainty with regard to vaccination arises from these cruses: when effectually performed, it is a certails preventive of the small pox. An office has openally been opened in Bangor, by the Health Committee, where every inhabitant may be vaccinated at the expense of the city. The oppor

CORRECTION: -

To the Editor of the Whig & Courier.

In the Mechanic & Farmer of yesterday, I stated, on the authority of public rumor, that his name as security to Charles G Bryant, Eag on his recognizance to appear at Albany before the Supreme Court of the United States, on a charge of violating our neutrality laws.

Since the publication of that paragraph, I learn that I was in error as to the offer of scenrity on the part of the Governor, and that no such offer was made by him; nor was any application made to any one by Mr. B. or his friends, as he preferred travelling at the expense

By inserting the above correction you will confir a favor, which I should be happy at tay linte to reciprocate.

EDITOR OF THE MECHANIC & FARMER. Bangor, June 8, 1833.

Charles G. Beyant, Esq. of this city, has been arrested, on the complaint of the District Attorney of the Northern District in New York, for an alleged breach of the Neutral Law of the United States. After, an examination before Judge Ware of this District, Mr. B. was ordered threeognize in the sum of \$2000 for his ap. pearance at the District Court in Albany on the second Tuesday in June, inst. This he declito relect lots under the new land law, for them- rily offered to be his security. By declining to recognise, he avoids the expenses, of his jourployed. Most of these persons are agents for ney, and is now proceeding on his way in custody of Col. Parks, the Marshal of this District. [Mechanic & Farmer.]

The St. John Sentinel in noticing the first public acts of Lord Durham, the new governor of Canada, compliments him for his zeal in relation to the boundary question, and says:

"The task of transmitting their early schired had even been commenced by their order prior to 1 ord Granville's application Having formed the project of erecting a monument to the mem. ory of Jacques Cartier, the first European who settled in Canada, they got persons in France to collect his voyages, and saccrisin by means of the early maps of Canada the precise spot where he founded the Establishment of de St. Croit, which they had selected for the site of the projected monument. It cannot, therefore but please the inhabitants of Quebec, and the French Canadians in general, to see that one of the first acts of Lord Durham has been to collect their annals."

The British are determined now to claim enterprising inhabitants of Penobscot receive the sentiment in the following extract. We should not be surprised, if John Bull should wes how calmly all his aggressions are borne by the U. States.

"We have before mentioned, that the Penob scot miver is evidently the trag St. Croix mentioned in the treaty that it was always so called and known by the early inhabitants of the country, that it is so leid down in the French wars and charte, and that it formed the boundary line of the English and French rattlements, before the conquest of this country by Great Britain. It therefore le gratifying to find, as will be, eren by an afticle under the Quebec head, that reference is about being had to the archives of Paris; when we trust ansient records will be satisfactorily consulted upon the subject.

The first object of interest which arrests the eye of the stranger upon entering the city of Havana, is the "Plaze de armes" or Governor's more than a name with them. Square, of surpassing beauty, much improved of late years. It is a delicious spot indeed, s garden, ornamented with trees, shrubbery and grace plots, neutly trigioned and closely out: with richly paved walks running through it in every direction, dividing it into four squares. Each of these squares is farther beautified by a fountain, from which flows, at a height of some alienation from them has anded to reduce them six or eight feet, a stream of anol pure water, fal. to terms of such unspeakable distress, I have ling into a basin below. On the opposite side of the Square from the Palace, is a beautiful little chapel and monument-dedicated to the memory of Columbus and to the first mass said by him on the island. It is confidently asserted that the tree which formerly stood in the spot now occupied by the little garden in front of the chapel, was that under which the discoverer of the western world held his first talk with the natives of Cuba, hesitation in anying, that an unauspected amongst. There are fountains at each end from which water is obtained for the constant sprinkling of the carriage way. The garden and buildings constituting Gov. Tacon's summer residence, were kept in fine order, by glavewho lived on the spot; flowers of every description are in constant bloom; fountains pour forth their reviving streams, and an artificial water-fall and diverted river add much to the beauty and romance of the scene.

The hat impravement of Gen. Tecon, though not the least of the many, was the opening of a new gate, by that of the gate of Monserrate, and the building of a stone bridge across the disch without the walls for the accommodation of the travel of the city, which had become so great through this principal gate, that it was ofmore than they ever have before. COO CONTRACTOR OF THE PARTY OF Managarati (Caranta de Caranta de A STREET OF STREET STREET

THE most sale, effectual and economical remody for disease, of the Human Constitution, that has ever been discovered.

These Pills are composed entirely of materials extracted from Medical Plants, and are warranted not to contain one particle of mercury, or any mineral substance. Dr. Kingley, the inventor of this valuable medicine, from his knowledge of the human system derived from a long and extensive practice, has arrived to the conclusion, that the great and primary cause of most discuss a la a derangement in the functions of the livery or in other words an inerensed or diminished secretion of the Bile.

So well is this understood, that it is common for persone to say when they feel unwell that they are bilious, meaning that they have too much bile in the stomach. 'On the other hand, when the flew of bile is diminished, the process of digostion is imperfectly beformed the path at becomes weak and an lated because nourishment contained in the fond taken into the atomach is not properly extracted, and the food is ejected in a grude stafe. Dr. Kingley is confident that the famous Hygenn Theory, so called, that "impurity of the blood is the cause of all diseases," is a great absurding. Every one who reflects upon the subject a moment, will perceive that impurity of the blood is a secondary and a primary campilability. the blood is a secondary, not a primary complaint the effect, and not the cause of the disease. the functions of the liver are deconged; and the flow of bile increased, it is often taken up by the absorb-ent vessels and carried into the eleculation, and be comes mingled with the blood as in Jaundice, when the patient shows it in his counterance. Now this impurity of the blood is caused by an increased flow of the bile, and to remedy it you must correct the secretion of the liver and restore it to a healthy state. Dr. Kingley has spent much time in experiment-

ing with different vegetable medicines, for diseases Little lives, and now oners his Universal Fami Pills as the best, most convenient and cheapest medicine that can be prepared for general use; said in offering them to the public, he is actuated more by benevolent than pecuniary motives, as the price of the medicine will show.

Dr. Kingley flatters himself that his long experi menting with vegetable medicines has enabled him to discover the time and only substitute answering all the purpose of mercurials, without any of their attendant evils. One great quality of his family Pills is, that they have the alterative principle comwith their cathactic or operative quality, so that they not only cleanse the stomach and bowels by purging, but they regulate the liver, change the and Marble, and have engaged Mr. G. A. Longfel morbid secretions, strengthen the digestive organs, how, who will pay particular attention to Sign and

tone and energy to the nervous system.

They are mild and pleasant in their operation, and almost immediate conviction of their utility from the first dose. They can be taken with safety by persons of any age, and the facble, the letter, the nervous, the delicate, are strengthened by their operation, because they clear the system of bad humors. quiet mervous irritabilities and restlessmess, from whatever source, and invariably produce sound

The Family Pills are an invariable remedy for jaundze, sięk and nervous headache, dyspepsią, castiveness, sickness of the stomach, heartburn, all bilious complaints, levers of all kinds, and if taken as the commencement will invariably check their progress, and save the patient from a protracted and daugerous siekuess. They are invaluable in nervous and hypochondriacul affections.loss of appetite, and all complaints to which females alone are subject. They operate as a mild and speedy purge, and are a safe and certain remedy for worms in

elijidren. I might publish a small volume of cestificates but consider it unnecessary, as the medicine will recom-Inend itself to all who will make trial of it. JOHN KINGLEY.

These Pills are put up in neat boxes of two sizes; the small size contains 25 Pills, and the retail price is To cents, the large size contains 60 Pills, the price is
